Interactive 100 square Link

<https://www.topmarks.co.uk/learning-to-count/paint-the-squares>

Start by picking a number up to 50 or up to 100 and count on ten from that number so you are counting over the ten eg. 28, 29, 30, 31. Then use the hundred square and cover one or two of the numbers and try and spot what is missing my counting either side. The use the hundred square or interactive hundred square to find all the missing numbers. This does not need to be printed.

Missing Numbers

Fill in the missing numbers from these sections of hundred squares.
